

Please do not change the way that FM radio is heard in my community by allowing LPFM stations to take priority over current FM translator services. When I listen to the radio, I almost always listen to K-LOVE. That station has such a powerful impact in communities where it is broadcasted. Listeners get to hear news stories that they would not get to hear in the mainstream media. The station also has public announcements that are broadcasted locally in communities that would otherwise have difficulties getting the information spread to a larger number of people. And the bottom line is that the station is as it claims to be: positive and encouraging. There are NO other stations in the Cincinnati area that have the same type of broadcasting. Day after day K-LOVE receives testimonials of how they have helped people across the country through difficult times. K-LOVE helped me as I dealt with my mom having breast cancer. Please don't let this radio service be replaced!! Thank You.
